State of Origin: Akwa-Ibom

LGA: Ukanafun

SUMMARY

As an accomplished and driven engineer with two years of experience in software development, I have demonstrated expertise throughout the entire Software Development Life Cycle and successfully deployed large-scale, intricate software applications. I am adept in programming languages including TypeScript and JavaScript, and experienced in leveraging frameworks such as ExpressJs and NestJs. My proficiency extends to infrastructure tools including Docker, Git, MySQL, and MongoDB. I have a proven ability to serve as both a team leader and contributor, fostering efficient progress within the work environment. I am adaptable and quick to assimilate into new work cultures, contributing effectively to collaborative and dynamic team settings. My skills include optimizing web applications for performance and scalability, writing clean code to develop functional web applications, building reusable code and libraries for future use, and collaborating with developers, designers, and system administrators to identify new features and integrate user-facing elements with server-side logic.

EMPLOYMENT HISTORY

NestJs Backend Instructor - Start Innovation Hub

Uyo, Akwa-Ibom

October 2022 - Till Date

1. Mentor newbies on TypeScript, NodeJs and from the scratch.
2. Mentor newbies on how to build REST APIs with NestJs Server-side application using best practices.
